**Section 2. Hazards identification**

**Physical state**: Gas.

**Emergency overview**: Warning!

CONTENTS UNDER PRESSURE.

HARMFUL IF INHALED.

CONTAINS MATERIAL WHICH CAUSES DAMAGE TO THE FOLLOWING ORGANS:

BLOOD, LUNGS, CARDIOVASCULAR SYSTEM, SKIN, CENTRAL NERVOUS SYSTEM, EYE, LENS OR CORNEA.

MAY CAUSE RESPIRATORY TRACT, EYE AND SKIN IRRITATION.

Avoid contact with skin and clothing. Avoid breathing gas. Do not puncture or incinerate container. Keep container closed. Use only with adequate ventilation. Wash thoroughly after handling.

Contact with rapidly expanding gases can cause frostbite.

**Routes of entry**: Inhalation, Dermal, Eyes

**Potential acute health effects**

- **Eyes**: Moderately irritating to the eyes.
- **Skin**: Moderately irritating to the skin.
- **Inhalation**: Toxic by inhalation. Moderately irritating to the respiratory system.
- **Ingestion**: Ingestion is not a normal route of exposure for gases

**Potential chronic health effects**: CARCINOGENIC EFFECTS Not available.

MUTAGENIC EFFECTS Not available.

TERATOGENIC EFFECTS Not available.

**Medical conditions aggravated by overexposure**: Repeated exposure to a highly toxic material may produce general deterioration of health by an accumulation in one or many human organs.

See toxicological Information (section 11)

---

**Section 4. First aid measures**

No action shall be taken involving any personal risk or without suitable training. If fumes are still suspected to be present, the rescuer should wear an appropriate mask or a self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

**Eye contact**: In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention immediately.

**Skin contact**: In case of contact, immediately flush skin with plenty of water. Remove contaminated clothing and shoes. Wash clothing before reuse. Thoroughly clean shoes before reuse. Get medical attention.

**Frostbite**: Try to warm up the frozen tissues and seek medical attention.

**Inhalation**: If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention immediately.

**Ingestion**: Do NOT induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Get medical attention if symptoms appear.

---

**Section 5. Fire fighting measures**

**Flammability of the product**: Non-flammable.

**Auto-ignition temperature**: The lowest known value is 608.89°C (1128°F) (Carbon monoxide).

**Products of combustion**: These products are carbon oxides (CO, CO₂), nitrogen oxides (NO, NO₂...).

**Fire fighting media and instructions**: Use an extinguishing agent suitable for surrounding fires.

If involved in fire, shut off flow immediately if it can be done without risk. Apply water from a safe distance to cool container and protect surrounding area.

No specific hazard.

**Special protective equipment for fire-fighters**: Fire fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full facepiece operated in positive pressure mode.

---

**Section 6. Accidental release measures**

**Personal precautions**: Immediately contact emergency personnel. Keep unnecessary personnel away. Use suitable protective equipment (Section 8). Shut off gas supply if this can be done safely. Isolate area until gas has dispersed.

**Environmental precautions**: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
Nonflammable Gas Mixture: Carbon Dioxide / Carbon Monoxide / Nitrogen

Section 7. Handling and storage

Handling: Avoid contact with eyes, skin and clothing. Keep container closed. Use only with adequate ventilation. Do not puncture or incinerate container. Wash thoroughly after handling. High pressure gas. Use equipment rated for cylinder pressure. Close valve after each use and when empty. Protect cylinders from physical damage; do not drag, roll, slide, or drop. Use a suitable hand truck for cylinder movement.

Storage: Keep container tightly closed. Keep container in a cool, well-ventilated area. Cylinders should be stored upright, with valve protection cap in place, and firmly secured to prevent falling or being knocked over. Cylinder temperatures should not exceed 52 °C (125 °F).

Section 8. Exposure Controls, Personal Protection

Engineering controls: Use only with adequate ventilation. If user operations generate dust, fumes, vapor or mist, use process enclosures, local exhaust ventilation, or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

Personal protection

Eyes: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts.

Skin: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory: Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

The applicable standards are (US) 29 CFR 1910.134 and (Canada) Z94.4-93

Hands: Chemical-resistant, impervious gloves or gauntlets complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

Personal protection in case of a large spill: Full chemical resistant suit and self-contained breathing apparatus only by trained and authorized persons.

Consult local authorities for acceptable exposure limits.

Section 9. Physical and chemical properties

Molecular weight: Not applicable.
Molecular formula: Not applicable.
Boiling/condensation point: Not available.
Melting/freezing point: -198.88°C (-326°F) based on data for: Carbon monoxide. Weighted average: -208.12°C (-342.6°F)

Critical temperature: The lowest known value is -146.9°C (-232.4°F) (Nitrogen).

Vapor density: The highest known value is 1.53 (Air = 1) (Carbon Dioxide). Weighted average: 1.05 (Air = 1)
Specific Volume (ft³/lb): Not applicable.
Gas Density (lb/ft³): Weighted average: 0.08

Section 10. Stability and reactivity

Stability and reactivity: The product is stable.
Incompatibility with various substances: Not considered to be reactive according to our database.

Chronic effects on humans: Contains material which causes damage to the following organs: blood, lungs, cardiovascular system, skin, central nervous system (CNS), eye, lens or cornea.

Other toxic effects on humans: No specific information is available in our database regarding the other toxic effects of this material for humans.

Specific effects:
- Carcinogenic effects: No known significant effects or critical hazards.
- Mutagenic effects: No known significant effects or critical hazards.
- Reproduction toxicity: No known significant effects or critical hazards.

Section 12. Ecological information

Products of degradation: These products are carbon oxides (CO, CO₂), nitrogen oxides (NO, NO₂...).

Toxicity of the products of biodegradation: The products of degradation are less toxic than the product itself.

Environmental fate: Not available.

Environmental hazards: No known significant effects or critical hazards.

Toxicity to the environment: Not available.

Section 13. Disposal considerations

Product removed from the cylinder must be disposed of in accordance with appropriate Federal, State, local regulation. Return cylinders with residual product to Airgas, Inc. Do not dispose of locally.

Nonflammable Gas Mixture: Carbon Dioxide / Carbon Monoxide / Nitrogen

Section 15. Regulatory information

United States

U.S. Federal regulations:
- TSCA 8(b) inventory: Nitrogen; Carbon Dioxide; Carbon monoxide
- SARA 302/304/311/312 extremely hazardous substances: No products were found.
- SARA 302/304 emergency planning and notification: No products were found.
- SARA 302/304/311/312 hazardous chemicals: Nitrogen; Carbon Dioxide; Carbon monoxide
- SARA 311/312 MSDS distribution - chemical inventory - hazard identification: Nitrogen: Sudden Release of Pressure; Carbon Dioxide: Sudden Release of Pressure, Immediate (Acute) Health Hazard, Delayed (Chronic) Health Hazard; Carbon monoxide: Fire hazard, Sudden Release of Pressure, Immediate (Acute) Health Hazard, Delayed (Chronic) Health Hazard
- Clean Water Act (CWA) 307: No products were found.
- Clean Water Act (CWA) 311: No products were found.
- Clean air act (CAA) 112 accidental release prevention: No products were found.
- Clean air act (CAA) 112 regulated flammable substances: No products were found.
- Clean air act (CAA) 112 regulated toxic substances: No products were found.

State regulations:
- Pennsylvania RTK: Nitrogen: (generic environmental hazard); Carbon Dioxide: (generic environmental hazard); Carbon monoxide: (environmental hazard, generic environmental hazard)
- Massachusetts RTK: Nitrogen; Carbon Dioxide; Carbon monoxide
- New Jersey: Nitrogen; Carbon Dioxide; Carbon monoxide

California prop. 65:
- WARNING: This product contains a chemical known to the State of California to cause birth defects or other reproductive harm.

Ingredient name: Cancer Reproductive No significant risk level Maximum acceptable dosage level

Canada

WHMIS (Canada):
- Class A: Compressed gas.
- Class D-1A: Material causing immediate and serious toxic effects (VERY TOXIC).
- Class D-2A: Material causing other toxic effects (VERY TOXIC).
- CEPA DSL: Nitrogen; Carbon Dioxide; Carbon monoxide

Section 16. Other information

United States

Label Requirements:
- CONTENTS UNDER PRESSURE.
- HARMFUL IF INHALED.
- CONTAINS MATERIAL WHICH CAUSES DAMAGE TO THE FOLLOWING ORGANS: BLOOD, LUNGS, CARDIOVASCULAR SYSTEM, SKIN, CENTRAL NERVOUS SYSTEM, EYE, LENS OR CORNEA.
- MAY CAUSE RESPIRATORY TRACT, EYE AND SKIN IRRITATION.

Canada

Label Requirements:
- Class A: Compressed gas.
- Class D-1A: Material causing immediate and serious toxic effects (VERY TOXIC).
- Class D-2A: Material causing other toxic effects (VERY TOXIC).
